WITH A 1/4" FLEX
CONNECTOR OR AIR
TUBING INTO THE
PRODUCT PIPE

SCREWS
DIRECTLY
INTO THE
SURROUNDING
PUMP TANK
VENT/RETURN

This is a poppet (piston) and spring type anti-siphon valve where the spring constantly opposes the pressure acting against the piston which seals off the product inlet port. When loss of product pressure in the product line, the Anti-Siphon Valve opens up to STOP the tank from being able to siphon. Spring Range: 2 psig / 0.138 barg

- Body: 302SS
- Poppet/Guide Assembly: 302SS
- Seat (wetted): Viton
- Spring: 302SS
